IN PARTNERSHIP WITH THE IMAGINATION

Endicott products serve as the building blocks of the imagination. Giving life to ideas, bringing beauty and functionality to form and raising the level of craftsmanship to new heights. A partnership in the truest sense, Endicott enhances the imaginations of great architects and helps them realize their dreams.

The uniqueness, versatility and quality of Endicott products are legendary for their ability to amplify the design and give shape to the vision. Endicott prides itself on providing designers and builders with a product palette unequaled in the industry.

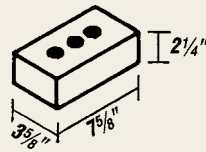

Available in a myriad of shapes, textures and dazzling colors, Endicott products are nationally recognized for their unmatched elegance and design versatility. Endicott has the raw materials and manufacturing facilities to fire the finest architectural products. You have the imagination. A partnership is in the making.

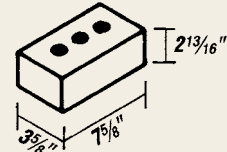

FACE BRICK

Endicott has a face brick to meet most any design criteria. A variety of colors, including authentic Ironspots and a wide selection of textures and sizes, provides the designer with an array of product selections.

Grey Heritage; Modular

Private Residence – Sioux Falls, South Dakota
Burgundy Sands; Heritage Texture; Modular

PAVERS

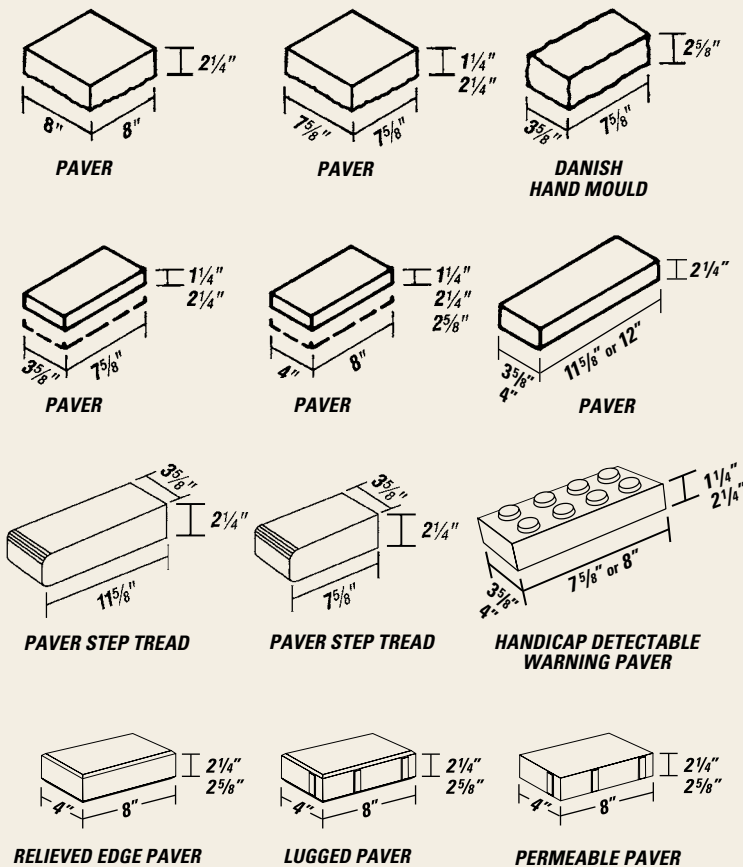

Endicott's complete line of brick pavers gracefully enhances any landscape setting and coordinates with Endicott's face brick, tile and pool coping.

Endicott's relieved edge pavers feature beveled edges that make a unique visual presentation. The pavers are set hand-tight or butt joint. Beveled edges create a spaced joint effect, yet are not grouted. Small spacings (1/16"-1/8") between units accommodate sand sweepings to keep the units apart and create interlock. They're manufactured to meet ASTM C902, Class SX, Type I, Application PX or ASTM C1272, Type R, Application PX specifications.

Independence Grove Forest Preserve – Libertyville, Illinois
Custom blend of paver colors and sizes

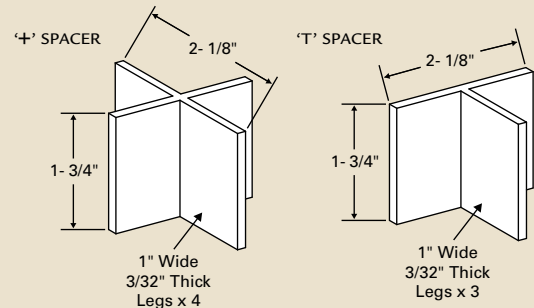

SIZES & SPECIFICATIONS

PAVER SPACERS

ELIMINATE PAVER CHIPPING PROBLEMS

Create and assure the needed spacing between pavers to avoid expensive and unsightly chipping. Keep the crisp appearance of square edge pavers!

Handicap Detectable Warning Pavers

Consult the American Disabilities Act of 1990 Accessibility Guidelines for exact requirements and usage.

PAVERS (ALL PAVERS ARE WIRECUT TEXTURE)

RED BLEND

South Dakota State University – Brookings, South Dakota
 Special Blend; Thin Brick Precast; 1/2" x 2-1/4" x 7-5/8"; Wirecut Texture

Meets or exceeds the requirements of ASTM-C1088 specifications.

THIN BRICK

Endicott thin brick is ideally suited to year-round commercial, residential and remodeling applications. Genuine kiln-fired thin brick possesses the durability and unparalleled elegance of Endicott face brick, yet maximizes space and weighs considerably less.

There are a number of prefabricated panel systems available to the industry that can receive the thin brick

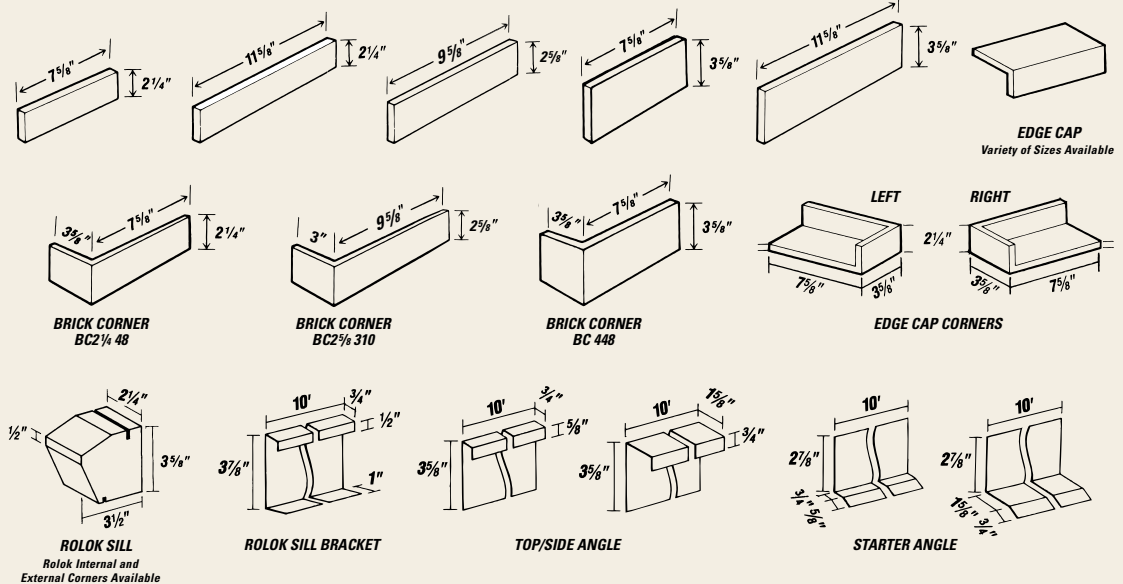

as factory or job site applied. Reputable installation suppliers have literature that you may obtain for review regarding project applicability.

Endicott thin brick may be applied over any structurally sound substrate. And because no footings or supports are required, thin brick may extend all the way to grade.

SIZES & TRIM UNITS

Endicott's unique "keyback" design mechanically locks thin brick into the concrete for maximum durability and permanence.
